

# Code-Along 8 + Challenge 8

Yang Juan Hun

2023-10-09

```
# Invoke the package  
library(shiny)
```

```
## Warning: package 'shiny' was built under R version 4.2.2
```

```
# Run an example from the library  
#runExample("01_hello")
```

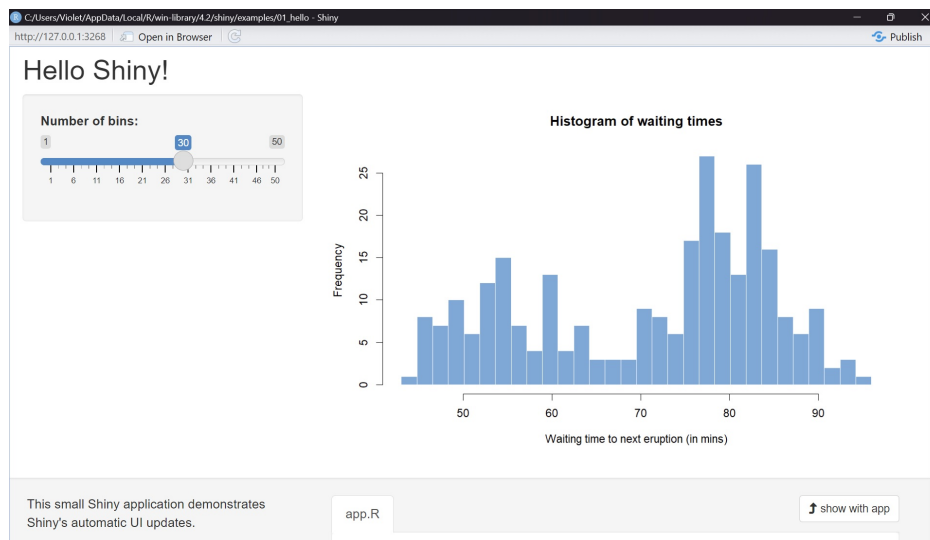

Figure 1:

```
#running custom app  
#library(shiny)  
#runApp("App-1", display.mode = "showcase")
```

```
library(shiny)  
#runApp("App-2", display.mode = "showcase")
```

I changed the reactivity example of Shiny by editing the texts in the sidebar panel, the texts in the main panel and also adding images. I changed some fonts as well.

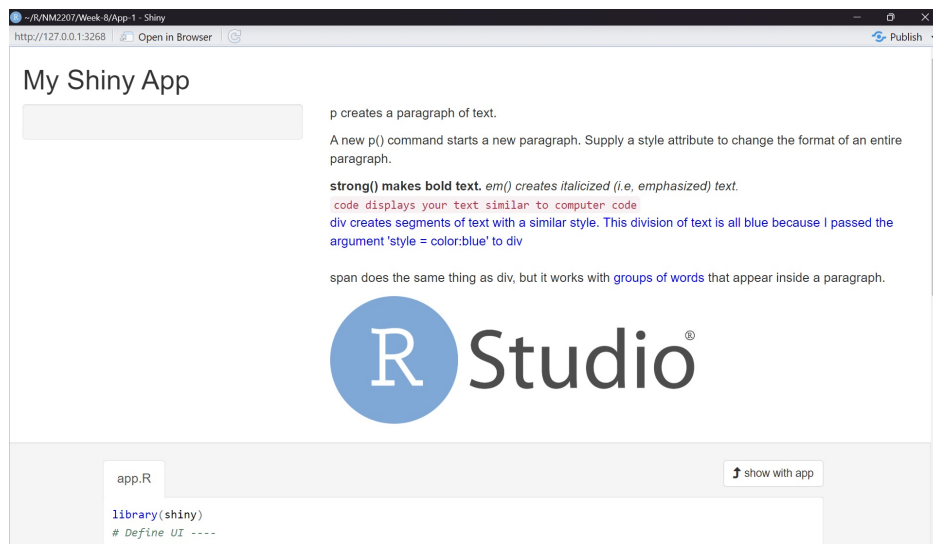

Figure 2:

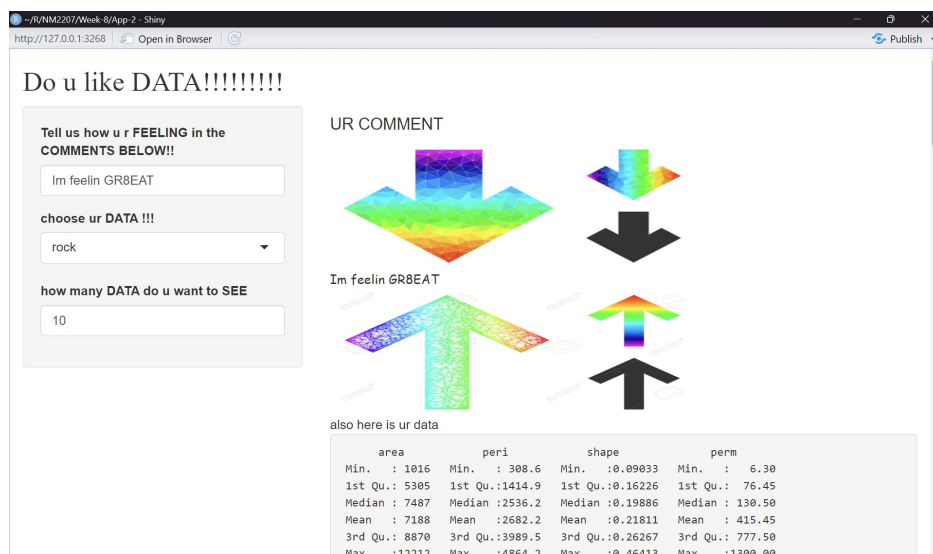

Figure 3: my custom app :))
